Grand Rapids Hydraulic Company in the Sheriff's Hands

JUDGMENTS FOR THOUSANDS

2. J. O'Briss Appainted Baselvar-To Shapif Will Sold the Plant Until

The Grand Rapids Hydroulic over-sary is in core straits. Yesterday judg-seats aggregating \$150,192.86 were res-tered in the United States and circuit while a newly appointed received tands ready to receive as soon as he an quat the sheriff. Monday evening he Gloucester from works secured a judg-ment for \$25,774.11 in the circuit court ment for £3,774.11 in the circuit court and immediately took out execution and levied on the plant. The matter was suppressed by the cierk of the court to allow the sheriff to get possession before the other creditors found out what was going on. Yesterday W. E. Coffin of New York secured three judgments remines the company one for \$11.600.46. against the company, one for 801,600,46, one for \$17,574.24, and one for \$2.234.05. In the case of the American Loan and Trust com-

pany an order was granted appointing T. J. O'Brien, receiver of the concern. The Hydraulic company has been in hard shape for several years. It has not been able to keep up the interest on its great bonded indebtedness and the red-dering of the great tonded indebtedness and the red-dering of the judgments yesterday sim-ply brought the affairs of the company to a close. T. J. O'Brien, as receiver, filed bonds in the sum of \$20,000, with J. M. Barnett and Willard Barnhart as sure-tics. Sheriff Lamoreaux was asked last night if he would turn the plant over to the receiver. He said be would hold the plant until the judgment of the Glouces-ter iron works is satisfied.

The appointment of a receiver before

The appointment of a receiver before W. E. Coffin obtained his judgments will prevent his levying on the property of the company.

Is a very popular engraving in France, representing phantom warriors mustering through the moonlit clouds to march past before the ghost of Napoleon.

A review of the ghost of ancient, antiquated and departed styles in the Furtiture line would also be interesting, compared with the artistic designs of today. It does not take a very "bald head" to remember spindle bedsteads, with corner posts reaching nearly to the ceiling, and the age of bed cords. you can recall the old-fashioned bureau and standing on tiptoe to look into the top drawer. Did you ever hang your hat and coat up in the tall clock and then sit down on a bench by the
